> The fact of a perfect entente bein China is made more clear by this move. Did not a perfect understanding prevail, the sudden ordering of a British army division to the soil of North America might well become the subject of a pointed inquiry from Washington. Her action is in accord with that of the United States government in suddenly strengthen ing its garrison in the Philippines, by the addition of regiments, mainly of negro troops. With ten regiments of the line of the western coast of North America, Great Britain wil be prepared to cope with any imme-

diate crisis that may arise in China. The opinion prevails that any disurbance in China will be taken adantage of by Germany, even to seizng the entire Shantung peninsula and declaring a German colony, but no aggressive move on the part of Germany or any other European power will find Great Britain or the United States unprepared. In event of omplications, the two latter powers would be the first to land troops in large numbers on Chinese soil.

BRAVED BAPTISM IN ICY

Anderson, Ind., Feb. 6 .--When forty converts of the First Methodist Episcopal and Gospel Mission churches braved snow-storm and went to White river, in this city, to be baptized at 4 o'clock Sunday afternoon, 2,000 people followed. Rev. C. Cissell cleared space for the baptizing in the frozen river by intentionally breaking through the ice with his own weight, each time going down into four feet of water barehanded he shoved the ice out of the way. Hundreds of men and boys hooted and yelled the minister broke through the ice and floundered in icy water. The first man, 9 Raymond Scofield, could not stand the water, broke away from the minister and ran out of the water without being immersed. Five women and of the forty converts concluded to defer their baptism to some other time, and fled for home.

A blinding snow-storm prevailed, and Rev. Cissell was in the river thirty-five minutes.

JOHN R. HEGEMAN, President

The Company OF the People, BY the People, FOR the People

A REASONABLE INDICATION OF THE DE-SERVED POPULARITY

of its plans and of faith in its management may be fairly claimed in the number of Metropolitan policies in force. It is not only greater than that of any other company in America, but greater than that of all the other regular companies combined, less one. It exceeds, in fact, the COMBINED POPULATION of 24 of the States and Territories out of the 52 forming the American Union, viz: Maine, New Hampshire, Vermont, Rhode Island, Connecticut, Delaware, District of Columbia, Florida, Oregon, Colorado, Arizona, Alaska, Idaho, Montana, Nevada, Wyoming, Utah, North Dakota, New Mexico, Indian Territory, Oklahoma, South Dakota, Washington, Hawaii, and as to CITIES, it exceeds the combined population of Greater New York, Chicago, Philadelphia, Boston, St. Louis, Cleveland, Cincinnati and Milwaukee.

SIGNIFICANT FACTS

The Company's policy claims paid in 1905 averaged in number one for each minute and a quarter of each business day of 8 hours, and in amount \$105.83 a minute the year through. The value and timeliness of these payments may be gleaned from the fact that of the claims paid during the year, 4,326 were under policies less than 3 months old, 8,391 were on policies which had run under 6 months and 15,148 were within the first

THE DAILY AVERAGE OF THE COMPANY'S BUSINESS DURING 1905 WAS:

395 per day in Number of Claims Paid. 6,972 per day in Number of Policies Issued. \$1,592,484.00 per day in New Insurance written. \$123,788.29 per day in Payments to Policy-holders and

Addition to Reserve. \$77,275.94 ner day in Increase of Assets

The Metropolitan gained in insurance in force on which premiums are still being paid MORE THAN ANY OTHER COMPANY IN THE WORLD.

The Metropolitan wrote more business in the Industrial Department in 1905 than ever before in any one year. The Metropolitan wrote more business in the Ordinary Department in 1905 than ever before in any one year. The Metropolitan wrote more business in 1905 than any other Company in the world. And this for the 12th

The Metropolitan has more premium paying business in force in the United States than any other company. The Metropolitan has in force one-third of all the legal reserve policies in force in the United States. Its Industrial policies in force equal in number all the Industrial policies of all the other companies in the United States.

THE RATIO OF EXPENSE TO PREMIUM INCOME IN 1905 WAS THE LOWEST IN THE COMPANY'S HISTORY.

THE TWO DEPARTMENTS

In the Ordinary Department policies are issued for from \$1,000 In the Ordinary Department policies are issued for from \$1,000 to \$1,000,000 on individual lives, premium's payable annually, semi-annually, or quarterly. In its Industrial Department (which is family insurance) policies are issued on all the insurable members of the household with premiums payable weekly.

This Company issues no TONTINE or other forms of deferred dividend policies, in which the amount to be paid to the insured must largely be a matter of ESTIMATE at the inception of the contract, and of DIS-APPOINTMENT at its maturity.

Its policies are plain business contracts which tell their whole story on their face; leave nothing to the imagination; borrow nothing from hope; require definite conditions; and make definite promises in dollars and cents. Is not the fact that, notwithstanding the agitation in life insurance, the Metropolitan wrote more insurance in its Ordinary Department in 1905 than it ever wrote in any preceding year, proof that GUARANTEED BENEFITS for a fixed premium are what people want?

In its Industrial Department policies no obligation to pay dividends is either expressed or implied, the premiums being at stock rates, without the "loading" designed for dividends; nevertheless the Company for years past, as a pure act of grace, has returned a part of its surplus, annually, to the holders of its policies. The total amount so paid, including the amount set aside for 1906, is

This means that boys heretofore sent to the school of itentiary, declares the Herald. It means that other boys will be conjails in daily contact with hardened criminals; and that still others, who need to be taught something of the sanctity of the law, will be dismissed by a merciful court, that considers no punishment better than the alternative offered. In the first instances, instead of the youthful culprit being reformed by the process of the courts, he will be successfully graduated in crime. "To try to reform a boy," says Judge Lindsey, "by throwing him into jail, is like trying to cure him of sickness by throwing him on the garbage heap." In the second instance, where the child charged with crime is simply dismissed by the court instead of being sobered and chastened by his contact with the law, he will simply gain the idea that the law is of no effect and not to be seriously re-

If the legislature of Kentucky passes, as it seems likely it will, the juvenile act and the adult delinquency act-two parts of a whole-recommended by the house judiciary committee, there will be created in every county in the state a machinery that may reform the boy culprits of that locality before they become criminals, and subsequent legislatures will not be called upon to deal with a tremendous re-

Tobacco has been bringing good prices this year, and there is much satisfaction among the farmers. AN APPEAL TO REASON

Common sense is the key to Good Health. Yet how many of us use good judgment?

How we all neglect the first symptoms—the beginnings of

disease. But let us have just one severe illness, and how glad we are to get well. Then afterwards what good care we take of our health. Nine-tenths of all our great afflictions, our chronic diseases, can be prevented. They start as simple ailments-all have the same cause-uric acid. It causes rheumatism, neuralgia, eczema, catarrh, kidney trouble, heart disease.

THE PROVEN THEORY OF URIC ACID POISONING When uric acid has changed into uric salts, and it settles in various

You of course know the uses of the blood. How it carries nourishment to every part of the body, and how it picks up all waste matter, and carries it back to be discharged from the sys-

posits of uric salts. But how? Before this waste matter is thrown off it separates into two things—uric acid and urea.

You have seen your friends take prescription and other medicines and they have not been cured. So it is certain that remedies which fail with them, will fail with you.

If all the organs are in perfect condition—which is very rare—the uric acid passes from the body properly.

But if the organs are not in perfect condition, the blood in taking nourishment to every part of the system carries in addition to each delicate organ, a large amount of uric acid.

A remedy which will remove the cause is the only way to cure any disease. LIFE PLANT removes the cause.

Raymond's eyes wavered, "Well, yes ne of them, but I don't care to pose as the student rancher. The boys respect me now because I can ride a horse and pitch hay. I make it a point not to air my other accomplishments"-

He was interrupted by a series of faint yells, and as they all listened the swift trample of horses' hoofs could be heard. Louis sprang up, all excitement, his eyes glowing.

"What is that-Indians?" Raymond smiled at Ann. "No, only a bunch of cowboys passing." He stepped to the door to study their approach. "It's a mob of Williams' men, I don't know what they're doing here. The rush and trample of hoofs swept nearer, and a group of five drab colored horsemen drew up at the hitching pole with loud outcries, each man-setting his pony on end with a wrench at

"Hello, Bob!" shouted the leader. "Howdy, boys-howdy?" he replied oldly. It was plain he was not well ased by their inopportune call. "Got anything to eat?" asked one of

them as he swaggered up. "Sure thing. Tidy up and come in." Raymond, turning to Ann, said gently; "Perhaps you and the boy had better step into the other room. This gang is coming in."

"They're not dangerous?" "No, but some of them are not fit to

eat in the presence of a lady." "Louis will want to see your guests." "Very well," replied Raymond and turned to meet his visitors, who appeared fresh from a hasty tollet. "Come right in, boys. What's the best word from over the ridge?"

The man who entered first was a big, rawboned, wide mouthed, freekle faced fellow, who gaped in amazement as he caught sight of Ann. "Hello! What's all this?" he asked, bunching the man next him.

The insolent vulgarity of his tone brought a flush of anger to Raymond's face. "Shut up?" he commanded in a low voice. Then added in explanation, "Some of Barnett's folks visiting the ranch." At the moment he hated them all with a sudden realization of their essential cheapness and their filthy

As they took seats each man glanced at Ann with furtive, devouring eyes, and she thrilled under the scrutiny as she would have done beneath the glare of a wolf. She had a sudden sense of danger. "I am getting close to the elemental man," she thought, and by con trast Raymond assumed new interest. Though his clothing was almost as rough as theirs, his face and voice be- win applause. Louis sat as one entranced studying the groupings in the sunset light, which had begun to dim a little. To him these men were heroic. Their physical hardihood, their slouching grace, their hardihood, their slouching grace, their rumpled hair, their tag ends of kerchiefs and greasy belts and cuffs were all "bang up material." The avid glare under which Ann shivered was hidden from the eyes of the boy, but Raymond took note of every nudge, every wink that passed, and once or twice he fixed his eyes on the man they called Speckle in a look which stayed a coarse jes upon his lawless lips,

They talked of the great, new mining camp on the side of Mogalyon, whereto they were all bound. "They're striking it rich in the grass roots, and we're going up to take a hand in it. Why, last week they made three strikes on Pine mountain within fifteen feet of the surface. They say the placer is turning out \$10 a day. So we're riding up to turn a rock on our own account. The plan of leaving a sensitive, poetic boy to the company and influence of men like these became these rough riders troubled her; but Raymond, to whom the boy's eyes aleady turned with fervent admiration, was more corrupting still, for whatever weaknesses he might have would surely come to be active and vital forces in lebasing others. The whole design, in the light of this encounter, assumed the face of folly.

The powerful young rancher, a mixure of barbarism and culture, engrossed her quite as a mountain lion might have done. His action could not be foretold, and she was amazed to find herself carried entirely outside herself, shaken and dismayed. As he set to work to put the table in order, silent and sullen as before, she watched him from her corner with intent gaze. How deeply can I trust him?" she sked herself. "Don admires him, and

D. ARMSTRONG'S

Fine Shoes for ladies just received and we will be glad to have our customers call and inspect this line. For good shoemaking this line stands at the top, and we are very proud of the fact that we have the exclusive agency for this shoe. More opportunity for a display of good taste is offered in the manufacture of ladies's fine shoes than any line of shoe making. You will recognize this good taste when you see D. Armstrong's shoes. These shoes hold their shape because the leather is thoroughly stretched before manufactured into a shoe.
